

setting up an voucher

To set up an voucher is almost self explaining. Anyway i'd like to show you how it's done by a little example. Once again I have to thank marx1900 and octen for providing the screenshots I will use.

Let's say we want to set up an voucher for a special customer. He shall not pay any shipping fees at all, have 20% sales discount on every listing and have an maximum usage of one time.
